

The following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (N = 1,000). The table is organized into three columns: "Variable", "Coefficient", and "Standard Error". The "Variable" column lists the independent variables used in the model. The "Coefficient" column shows the estimated effect of each variable on the number of children in the household. The "Standard Error" column shows the standard error of the coefficient estimate.
